

Diversity and Inclusion / LGBTQ Instruction grades 6-8

N.J.S.A. 18A:35-4.35-36 requires boards of education to include instruction on the political, economic, and social contributions of persons with disabilities and lesbian, gay, bisexual, and transgender (LGBT) people in appropriate places in the middle school and high school curriculum. The law also requires boards of education to adopt inclusive instructional materials that portray the cultural and economic diversity of society including the political, economic, and social contributions of person with disabilities and LGBT people, where appropriate.

The New Jersey Department of Education has developed the following resource list to assist districts in implementing this statute. These resources are provided for informational purposes only. The Department does not endorse these resources or the entities hosting these resources. Note that these resources are not exhaustive and may exceed the scope of the statutory requirements. Districts may choose to incorporate these resources at their discretion or select instructional materials outside of the list below to fulfill the requirements of the law. This will be updated as additional, accessible resources are identified.
